

# Daytona Super Champs

## Series Rules & Regulations 2020

### Daytona Milton Keynes

#### The Season

The season will be contested over five rounds, with a driver's best 4 scores counting towards their final Championship Standings. Both Sodi and DMAX Karts will race at the same time.

Round 1 – 18<sup>th</sup> January  
Round 2 – 8<sup>th</sup> February  
Round 3 – 29<sup>th</sup> February  
Round 4 – 21<sup>st</sup> March  
Round 5 – 11<sup>th</sup> April

#### Categories

There will be 2 Championship classes; Senior Lights and Senior Heavies.

#### Eligibility

Any experienced driver aged 14+ in Sodi or 16+ in DMAX will be eligible to enter into the Super Champs series.

All Drivers will be weighed in for the first round, this will determine their weight class for the championship. Drivers will then be weighed for each round to check they are still within the thresholds.

Light drivers will be required to weigh a minimum of 65kgs, whilst Heavy drivers will be required to weigh 85kgs. Daytona can supply limited ballast for DMAX Drivers only but anyone requiring significant ballast (more than 10kgs), or a Sodi Kart should make arrangements to provide their own.

Any driver who weighs 80kgs or less will be only eligible for the lightweight class.

For the Heavy class, drivers can carry no more than 5kgs of ballast to achieve the 85kgs minimum weight at the first round of the season.

If at the lower end of the height range, it is advised to organise a seat fitting.

If at the lower end of the weight range, please do contact us for advice on how to achieve the minimum weight limit.

## **The Format**

Drivers will take to the circuit together for a 10-minute untimed Practice session.

Each class will take part in a 5-minute qualifying session, DMAX will head onto circuit first, once the DMAX Karts have completed their qualifying, Sodi Karts will complete theirs.

Any drivers who receive a penalty in Qualifying will start at the back of the grid for the race start.

Once the chequered flag goes out for the Sodi Kart qualifying, all Karts will return to the pit lane. All karts for both classes will be put into order, and then sent out to circuit in single file.

The karts will then be sent, 2-by-2, towards the Start Line where the Start Line Marshal will start the race by waving the green flag. The race will be of 30-minutes duration.

If a driver spins during the rolling lap, they must start the race from the back of the grid.

Points will be awarded per weight class per round, as follows:

### **Final**

1st – 50 points	6th – 36 points
2nd – 45 points	7th – 34 points
3rd – 42 points	8th – 32 points
4th – 40 points	9th – 30 points
5th – 38 points	10th – 29 points

And so on down, minus one point for every position.

A bonus point will be awarded per class, per round, for the Fastest Lap in the Race.

All points that a driver scores during the meeting will be added together and this will be the score for the day. At the end of the season, a driver's best 4 scores will be added together to determine the Championship Standings.

Please note that any driver who has broken any rule or who has demonstrated bad behaviour on or off the track may face points being deducted.

At the end of the season, should two drivers be on equal points, the driver who has the most Round wins across the entire season will be placed first. Should this not split the drivers it will then fall to second place finishes, and then third place finishes if they are still not split. In a situation where this still does not determine a winner, then it will fall to the most 'Fastest Laps' across the season.

### **Trophies**

Trophies will be awarded to the top 3 drivers in the Light class and the top 3 drivers in the Heavy class at each round. Championship trophies will be awarded to the top 3 in each class at the conclusion of the final round of the season.

### **Driving Standards**

#### **Black Flag**

For any driving considered worthy of a penalty, the driver will receive a black flag. This indicates a 30-second Stop/Go penalty in the Pits.

A driver may also receive a black flag for an accumulated offence i.e. having received previous warning flags; any further offence will result in a driver receiving a penalty.

Should a driver receive 2 penalties in one Race Meeting, they will receive a 10-point penalty on top of their Stop/Go penalty.

If a driver receives 3 penalties in one Race Meeting, they will be disqualified from the round, and may face a suspension from the next round.

#### **Contact**

Karting is a non-contact sport and this will be strictly adhered to in the Championship. It is possible that in some cases, contact may occur as a result of a racing incident for example if a driver loses control of a kart and another "brushes" it in the process. The circuit staff are trained to recognise this type of eventuality and to report it to the Race Director.

Avoidable contact will not be tolerated and any driver deemed to have made avoidable contact with another driver will be penalised.

Depending on the severity of the incident, the drivers involved will be shown a warning board at the start line. This will be "NO BUMPING" for contact. Continued contact subject to severity may result in an immediate black & white flag or penalty (black flag).

#### **Kerbing and Track Limits**

Any driver observed putting more than 2 wheels on the kerbs will face a warning by the issue of a "NO KERBING" board being displayed. Repetitive use of the kerbs will result in a penalty or disqualification. Drivers will be warned/penalised as follows:

- 1<sup>st</sup> Offence – 'No Kerbing' board
- 2<sup>nd</sup> Offence – 'No Kerbing' board with warning flag
- 3<sup>rd</sup> Offence – Penalty Board (5 place penalty)

It will be assumed that any driver who is continuously exceeding the track limits is either unable to control the kart or trying to gain an unfair advantage. In both instances, the driver may receive a Penalty Board or even disqualified on the grounds of safety or fairness.

### **Overtaking**

This is always a highly disputed issue but for the purposes of the Championship the following rules will apply:

It is the responsibility of the driver doing the overtaking to do so safely. There is no rule as to whether overtaking should be done on the left or the right and a driver making an overtaking move in to a corner may not expect to complete the manoeuvre if the line he/she is taking is closing towards the apex as a result of the kart ahead being on the racing line.

If two karts are side by side on the approach to a corner, it is the responsibility of both drivers to ensure that they negotiate the corner safely. In other words, a driver may not deliberately “squeeze” another off the circuit. If two karts are alongside throughout a corner the driver on the inside must leave one kart width on the outside of the exit of the corner. The driver on the outside must leave one kart width on the inside of the corner.

The driver overtaking on the inside must be under control and at least halfway alongside the other kart at the point of entry, the driver on the outside must then yield as any contact made will be their responsibility.

### **Weaving/Blocking**

Weaving or blocking in an attempt to obstruct other karts is expressly prohibited.

It is not permissible to change direction by moving across the racing line more than once in any one instance and if a driver does this, it will be deemed as weaving and penalised as a result.

### **Spinning**

Any driver spinning a kart should firstly ensure that they depress the brake pedal to stop the kart rolling backwards across the track and risk collecting another driver. Failure to do so will suggest that the driver is not in control of the kart and will receive a penalty.

A driver must raise his/her hand in the air to warn other driver and marshals of their situation.

If the kart is still on the circuit, the driver may turn their way back in to the race provided that they have made sure that the circuit is clear. Any obstructive driving at this point will lead to a penalty.

If in doubt, wait before making a move.

### **Mechanical Failure**

Occasionally kart components do fail in spite of the highest standards of kart preparation and unfortunately this is part of motorsport.

Drivers must use the kart they have been allocated, preference to another or a competitor's kart will not be entertained. If there is a genuine issue which the Pit manager deems to require a kart swap the new kart will be allocated at random. Once a driver leaves the pit-lane, it will be assumed that they are satisfied with their kart.

If a driver returns to the pits with a problem during a race, no laps will be awarded back to the driver.

A driver suffering a 'slow' kart must report the problem to the Pit Lane Manager, there will be no change to the driver's points from that round.

Karts reported faulty by a driver will be looked at and may rejoin the line up if repaired / deemed fit to race. This may involve a competent marshal testing the kart or an engineer solving the relevant issue.

## **Flag Signals & Lights**

### **Green Lights/Flag**

Once on the grid, the lights on the gantry will go from red to green to start the race. In the event of a light failure a green flag will be waved in the air signalling the start of the race.

### **Chequered flag**

This signals the finish of any practice or race. All drivers are expected to respect the flag and treat it as a full course yellow.

### **Yellow flag or strobe light**

This is the most common and important signal. This indicates that there is an incident ahead. Drivers need to slow to half race pace, form a single line and proceed with caution with no overtaking.

Waved yellow: Local incident – no racing until past the incident and there are no flags or strobes at the following bend;

Static yellow: Full course yellow conditions – no racing until yellow flags & strobes are removed and a green flag is waved by the marshals.

Any drivers deemed to have driven dangerously or in a reckless manner (including but not limited to speeding) under the yellow flags or lights will be penalised.

### **Red flag**

Race stopped – bring the kart to a stop quickly and safely at the side of the track. Wait for instructions from the marshals.

If the race is able to resume, the positions in which the drivers crossed the start line on the previous lap will determine their positions for the restart.

The race will be restarted under Full Course Yellow with all drivers one kart length apart at ¼ racing speed. On approach to the start line a green flag will be used to start the race once more.

### **Black and white diagonal flag**

Driver warning – you are now being watched by the marshals so driving standards must improve.

### **Black Flag**

The Race Director may issue a black flag if they deem the recipient's driving to be too dangerous or reckless.

### **GO TO PITS board**

This may be issued at the Race Director's discretion if they suspect there is (or there clearly is) damage to a kart.

### **Cameras and Communication Equipment**

Drivers are welcome to use video cameras on the proviso that video footage must be submitted to Daytona Race Officials upon request. Any damage is the responsibility of the owners.

No form of communications device or music player may be used by drivers whilst on the circuit. Drivers found to be using any of these items will be asked to remove them and may face a penalty.

### **Driver and Spectator Behaviour**

The Race Director's/Race Incident Director's decision is final and must be accepted as being so in good faith by both the competitors and track officials.

Arguments and disputes with other drivers, associated spectators or staff of Daytona Milton Keynes by parents or other supporters and spectators will not be tolerated and may result in a points penalty or ban (subject to severity).

Daytona reserves the right to refuse entry as well as remove anybody from the premises at any time.

### **Rule Amendments**

Daytona Motorsport reserve the right to amend rules and regulations as required throughout the season. Any such amendments will be communicated to drivers.

### **In Closing**

The InKart Championship will be an excellent opportunity for drivers to test their mettle against one another.

I look forward to the coming season of the Super Champs, and I hope you do too. Please address any comments or concerns to [alistairpringle@daytona.co.uk](mailto:alistairpringle@daytona.co.uk) .
